

Weplus Chips

Chips, decorative topping

Brief description

Weplus Chips are toppings specifically designed for WestWood Finish products. They offer design options for the finished surface, while also optimising its non-slip property.

Material

Acrylate-based topping

Properties and advantages

- Receiver-compatible topping chips
- Can be used as a single colour or multiple colours

Areas of application

Weplus Chips are applied to the sealing layer (WestWood Finish) to enhance the appearance of the finish and enhance the non-slip properties of the surface. A non-slip level of up to R 10 can be achieved.

Packaging

1.00 kg in tub
20.00 kg in carton

Colours

Black, white, grey

Storage

Store the chips in a cool and dry area.

Consumption

Up to 50 g/m² depending on the desired appearance

Product application

Application equipment / tools

- Hopper spray gun

Application

Use the hopper spray gun to apply Weplus Chips to the sealer (Finish) while the coating is still wet. Depending on the required design of the surface, the coloured chips can first be mixed and a greater or lesser amount applied. However, applying an excess quantity should be avoided, i.e. in their final position the chips applied should not form a continuous coating at any point.

General information

The above information, especially information about application of the products, is based on extensive development work as well as many years of experience and is provided to the best of our knowledge. However, the wide variety of requirements and conditions on site mean that it is necessary for the product to be tested to ensure that it is suitable for the intended purpose. Only the most recent version of the document is valid. We reserve the right to make changes to reflect advances in technology or improvements to our products.
