

# WestWood Stair Edge Protection

### Brief description

The aluminium edge protector is specifically for use on stairs. It is bonded to the existing waterproofing layer with Wecryl 810 and does not need to be fixed mechanically.

The upper surface is grooved to provide a safe foothold.

### Material

Aluminium

### Properties

- slip-resistant
- non-skid
- easy to install

### Areas of application

Stairs, steps and edges in the WestWood waterproofing and surfacing systems.

### Dimensions

40\*25 mm, 3 mm, 2 m length

### Weight

approx. 0.5 kg each

Product information sheet

## WestWood Stair Edge Protection

### **Storage**

Store products in their original packaging and in a cool, dry and frost-free place.

### **Information on safety and risks**

Please refer to the safety data sheets for the products used.

### **General information**

The above information, especially information about application of the products, is based on extensive development work as well as many years of experience and is provided to the best of our knowledge.

However, the wide variety of requirements and conditions on site mean that it is necessary for the product to be tested to ensure that it is suitable for the intended purpose. Only the most recent version of the document is valid. We reserve the right to make changes to reflect advances in technology or improvements to our products.
