## Tried and tested in practice

Quality is defined as conformance to requirements.

Philip Bayard Crosby

The requirements themselves are based on the customers' needs. That is why customer orientation is at the heart of our quest for quality.

#### Customer opinions:

"WestWood's liquid-resin systems allow us to carry out repairs largely without having to remove the existing surfacing. In addition the fact that areas only have to be closed off for short periods means that we can practically continue to operate the car park as normal, which in turn helps our customers. The perfect teamwork between manufacturer and contractor has proved to us that we have found the right partner for the future."

PARK SERVICE HÜFNER GmbH + Co. KG from Stuttgart

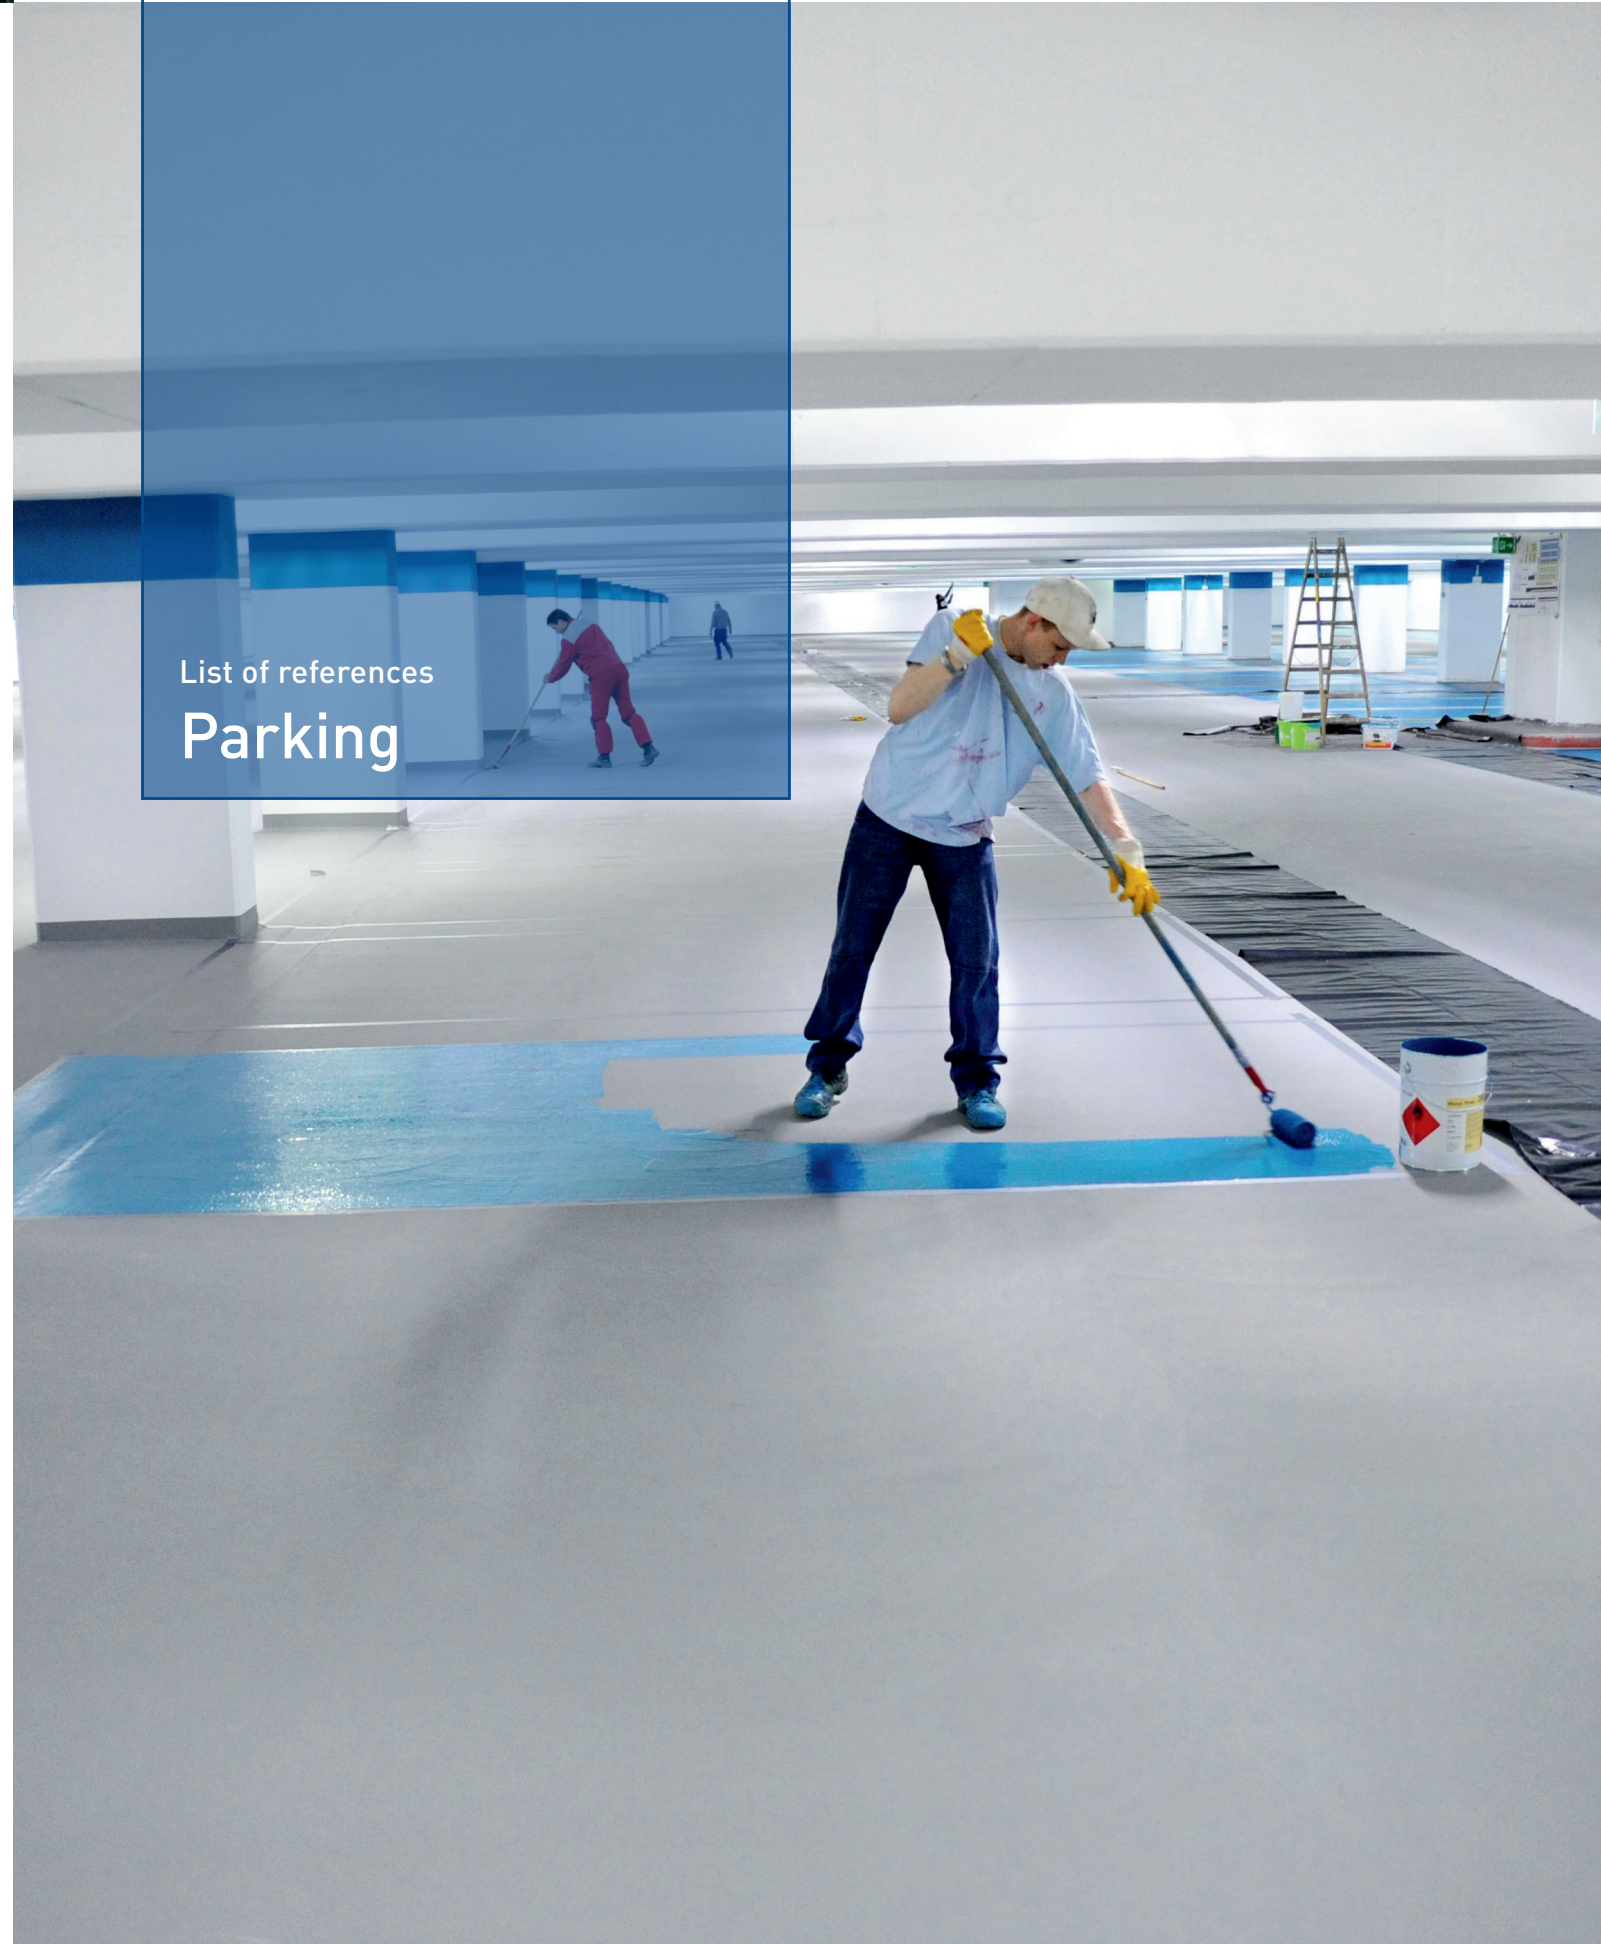

"We have relied on WestWood for years now because you cannot afford to experiment with waterproofing. They offer a specific as well as an economical, lasting and reliable solution, whether for roofs, balconies, wet areas or car parks."

Urs Krähenbühl, Head of Liquid Resin, Bauimpuls AG, CH-Heimberg

"From expert technical advice to professional, time-tested installation in our multi-storey car park with approx. 700 parking bays, WestWood has really proved its worth."

Parkhaus-Garage Hagemann GmbH + Co. KG/ Park-Center Kö from Düsseldorf

WestWood is both technically and economically impressive. The oldest, still serviceable waterproofing systems using flexible PMMA resins were installed in the 1980s and have therefore been in use for over 25 years now. In terms of their service life, WestWood waterproofing systems have been classified, according to their European Technical Approval (ETA), in the highest achievable category of W3 (durability > 25 years).

Year	Location	Project name	Application	Surface in m²
2004	Münster, D	Underground car park for Dental Association	Waterproofing of a heated ramp	200
2004	Minden, D	Private parking deck for Fielmann	Waterproofing of courtyard, with complicated details	105
2004	Düsseldorf, D	Kö multi-storey car park	Top deck, internal decks, underground car park, ramp and spiral ramp with textured surfacing	13700
2004 - 2005	Berlin, D	Meinekestrasse parking deck	High-build surfacing of ramp, slope 45° - 60°, waterproofing of top deck and ramp	495
2004 - 2005	Ravensburg, D	Frauentor multi-storey car park	Waterproofing and colour scheme for top deck, 2 ramps and thin-layer surfacing on <b>internal deck</b>	5950
2004	Frankfurt, D	Courtyard car park	Waterproofing of parking area	110
2003	Hanover, D	Private car park at Hamburgerallee	Optimal combination: first asphalt, then liquid resin for the top deck	600
2003	Tübingen, D	Neckar multi-storey car park	Waterproofing of details and ramp	800
2003	Tuttlingen, D	Multi-storey car park in city centre	Waterproofing of 3 internal decks as well as 6 ramps incl. textured surfacing	3060
2003	Cologne, D	Galeria Kaufhof multi-storey car park	Surfacing with waterproofing of details on spiral and straight ramps	3100
			The spiral entrance and exit ramp was refurbished in 2003. At approx. 4000 vehicles a day it is really put to the test. Even today, after approx. 10 m vehicles, the abrasion-resistant textured surfacing is still demonstrating its durability.  The expansion and working joints coated with the Wecryl joint waterproofing system remain free from cracks and serviceable today.	
2003	Ludwigshafen, D	Mottstrasse multi-storey car park	Waterproofing of internal deck and ramp (ramp in just 6 hours)	750
2002	Hamburg, D	Marks furniture store	Waterproofing of parking deck at temperatures as low as -10° C	450
2002 2005	Oldenburg, D	Waffenplatz multi-storey car park	Surfacing and waterproofing of details on top deck and ramps	3500
2002	Düsseldorf, D	Bleichstrasse multi-storey car park	Waterproofing and colour scheme for top deck, internal decks as well as ramp	12100
2002 - 2004	Hamburg, D	Panorama Inn-Hotel	Waterproofing and colour scheme for top deck, courtyard, ramp, underground car park	4510
2002	Düsseldorf, D	Kö (Königsallee) multi-storey car park	Waterproofing of the top deck	2300
2003	Cologne, D	Kaufhof P1 & P2 multi-storey car parks	Surfacing with waterproofing of details on spiral and straight ramps	3100
2001	Düsseldorf, D	Kaufhof multi-storey car park	Waterproofing of entry and exit ramps	590
